

Khaled Oweas

Professional Summary

As a seasoned Senior .Net/Angular Engineer with 10+ years of software development experience, I specialize in leveraging the latest .NET Core and Angular technologies to deliver robust and scalable web applications.

I spearheaded the digital transformation of a leading healthcare provider's patient management system, enhancing user experience and operational efficiency. My innovative approach to integrating Angular with .NET Core APIs facilitated real-time data processing, contributing to improvement in patient service delivery and establishing a new benchmark for healthcare software solutions.

My expertise encompasses a profound understanding of ASP.NET Core and modern Angular versions, enabling me to engineer efficient solutions that align with evolving web technology trends. I have a strong background in developing RESTful APIs, integrating with various databases and third-party services to ensure high-performance, cross-platform applications.

My career has been marked by successful projects focusing on building scalable and maintainable .NET applications integrated with Angular frontends

While my primary expertise lies in .NET development and Angular, I have limited experience with Azure, Cloud services, and CI/CD pipelines. I am eager to deepen my understanding of these technologies and enhance my skills through dedicated learning and practical application.

Skills

ASP.NET(Core/MVC/Web API)

ADO.NET

Entity Framework

WinForms

.NET Standard Libraries

ASP.NET Razor

HTML/CSS

JavaScript

Typescript

Angular

Angular Material

Work History

Mauve Mailorder Software - Senior .Net Developer

Steeler Wasserturm, Laurentiusweg, Germany

09/2022- Current

- Design and develop high-performance backend services using .NET technologies
- Implement efficient database solutions, including data modeling, optimization, and integration
- Build intuitive and responsive user interfaces using Windows Presentation Foundation (WPF)
- Collaborate with cross-functional teams to understand requirements and deliver exceptional software solutions
- Participate in code reviews, testing, and deployment processes to ensure code quality and reliability
- Stay up-to-date with the latest industry trends and technologies to continuously improve our solutions
- Actively involved in identifying and fixing bugs in a WPF-based CRM system, enhancing system stability and user experience.

EKO-Health-System - Senior Software Engineer

Egypt, Clients: (London, Saudi Arabia, Libya)

09/2015- 09/2022

- Developed and implemented a secure, EKOHS-compliant ADO.NET data access strategy for a leading healthcare software provider, facilitating seamless integration with electronic medical records (EMR) systems.
- Designed and maintained multiple enterprise-level applications using ASP.NET Core and Angular, enhancing overall performance.
- Extensive experience in desktop application development using WinForms and WPF.
- Detailed design and development of proof-of-concepts for application scenarios.

Blazor

Bootstrap/Tailwind CSS

Restful APIs

SQL Server

MySQL/PostgreSQL

Firebase

ElasticSearch

CI/CD

Docker

GitHub Actions

Git Source Control

Microservices

Webpack

Code Reviews

Refactoring

SOLID Principles

Design Patterns

Clean Code Practices

JIRA

Azure Work Items

GitHub Projects

Automations

- Proficient in relational database design and management systems, with expertise in SQL Server.
- Played a pivotal role in migrating legacy systems to modern .NET frameworks.
- Facilitated integration with third-party services using Web API.
- Developed RESTful Services for microservices using ASP.NET Core Web API, ensuring a clean separation of concerns.
- Spearheaded projects transitioning to the latest Angular versions, managing migration complexities and component refactoring.
- Developed a web-based dispensing panel with Blazor for prescription management and integration with insurance APIs.
- Expertly optimized data access layers using ADO.NET, significantly enhancing application performance.
- Designed robust data interaction logic with SQL Server, optimizing data retrieval times.
- Lead the decomposition of monolithic applications into manageable microservices focused on specific business capabilities.
- Mentored junior developers and conducted code reviews to maintain high standards of code quality.
