PROFESSIONAL SUMMARY

Senior/Lead software engineer with 10+ years designing, building, and operating production systems end to end — from database schema to deployed release. Strongest foundation in the .NET ecosystem (C#, ASP.NET Core, Web API, SQL Server, Entity Framework), with deep frontend experience in Angular and React with TypeScript. Based in Egypt and working remote-only with US companies across American timezones. Recent focus includes multi-tenant and multi-database architecture, application performance investigation, CI/CD with custom build agents, and dynamic reporting platforms. Independently designed and evolved live healthcare ecosystems used daily by patients, doctors, and staff (web, backend, database, and mobile apps on the App Store and Google Play).
